

Gynaecology column examination table

The last couple of years we have launched a number of new products built around a stylish and strong column motor from Linak, such as Podiatry and bloodsample chairs. The customer feedback has been very positive. Now we launch our new gynaecology examination table.

With its modern design and robust construction, the new table from Tarsus have all the qualities required by the medical sector of today. The ergonomic design makes it very user-friendly.

A low minimum and high maximum height help users to achieve a correct work posture and patients to get on and off the chair easily.

What is included?

Legrests, pull-out leg section, patient handles, electric height/Trendelenburg/backrest adjustment, neck cushion, central locking castors, SS bowl and paper-roll holder are all included, as well as both hand and foot controls.

Adjustments

The new gyn table has three motors, adjusting height, seat angle and backrest electrically.

Legrests

The legrests have a ball-and-socket joint and are therefore very easily adjusted to desired position. They are also fully adjustable in height and forward/backward along the rails. The black part for resting ones legs are made of integral foam, easily washable.

Patient handles

The chromium-plated patient handles work very good as support when getting on and off the chair. They may be adjuste along the rails and may - as the legrests - be removed fully from the chair to help when a patient is getting on or off the chair from a bed or wheel chair.

Chassis and castors

The all-welded steel chassis has a grey powder-coating. The sturdy 100 mm central locking castors are strong enough to move the chair while having a patient on.

The SS bowl

The stainless steel bowl is included. Outer size 34x21 cm, inner size ca 30x20 cm.

Pads

Comfortable, foam-plastic-filled covered in artificial leather. A wide variety of colours available to match the room decor. The backrest frame protects the pad from bumps.

Motors

220-240 V / 24 V. Hand and foot controls included. Available with battery backup (optional).

Dimensions

Length: 134 cm
 Length including pull-out leg setion: 174 cm
 Width: 55 cm
 Seat height: 55-95 cm
 Max height at highest point when the leg section is pulled-out and the chair angle is at max: 115 cm
 Backrest length: 92 cm
 Backrest angle: 10-60°
 Seat pad length: 39 cm
 Pull-out leg section LxW: 31x44 cm
 Trendelenburg angle: -22°
 Weight: 97 kg
 Lifting capacity: 165 kg

The luminaire that we sell may be mounted onto the chair.
