Total weight (g):

The weight changes based on the choices made below.

U3-light Y-front has a rigid rear axle. To find a balance that suits you, there are two versions, **U3 light Y-front** or **U3 light Y-front L**. L is more easy balanced and easier to drive on the rear wheels. You can tune the balance by placing the backrest in three different position. U3 Light has a seat height of 47 cm in front and 43 cm at the rear without cushion. **Max userweight is 100 kg for seatwidth 33-45.**

Save the guide to the "desktop" and open it with **Adobe Reader**, for best function **Design your wheelchair by clicking in the circles in this guide.** **Blue, underlined text is clickable to show info** or image. **BB** = seatwidth, **HH**= backrest height
