

FREEWHEEL - BACK REST ATTACHMENT- BAMBINO

To be able to attach the Freewheel Bambino to the back rest, when it's not in use, you need to utilise the D-shaped perch.(1)

This is because the round Panthera perch (2) is too small when Freewheel is adapted for Bambino with the thin shim (3). Assemble the perch in an angle showed in the image and attach the Freewheel on it. See the manual for more info of how to use your Freewheel.
