Wing Plast – *Quality Medical Instruments*

VagiSpec I 1318/1320/1322

Wing Plast's VagiSpec is a disposable vaginal speculum which since the 1970's is one of the most used speculums in Scandinavia. Now available in 3 sizes: Small (1318), Medium and Large.

- Stable construction
- Different spatula dimensions
- Easy to handle
- Smooth, rounded edges for increased patient comfort
- Can be used together with the Vagipress 1412/1422

1321

Z-Spec I 1321

Wing Plast's Z-Spec is a disposable vaginal speculum manufactured in an environmentally friendly plastic. Also known as "Sims".

- Clear plastic that gives an optimal view.
- Stable construction
- Different spatula dimensions
- Easy to handle
- Smooth, rounded edges

1412

1422

Vagipress | 1412/1422

Wing Plast's Vagipress are vaginal depressors in environmentally friendly plastic for single use. Available in two different designs: Loop (1412) och Solid (1422). The instruments are well-known in Scandinavia and include the following benefits:

- Smooth shaped surfaces and edges
- Stable construction
- Easy to handle
- Different dimensions of the spatula ends
- The slit in the depressor can be attached to the side edge of the VagiSpec, which allows both instruments to be used with one hand.

1377

1375

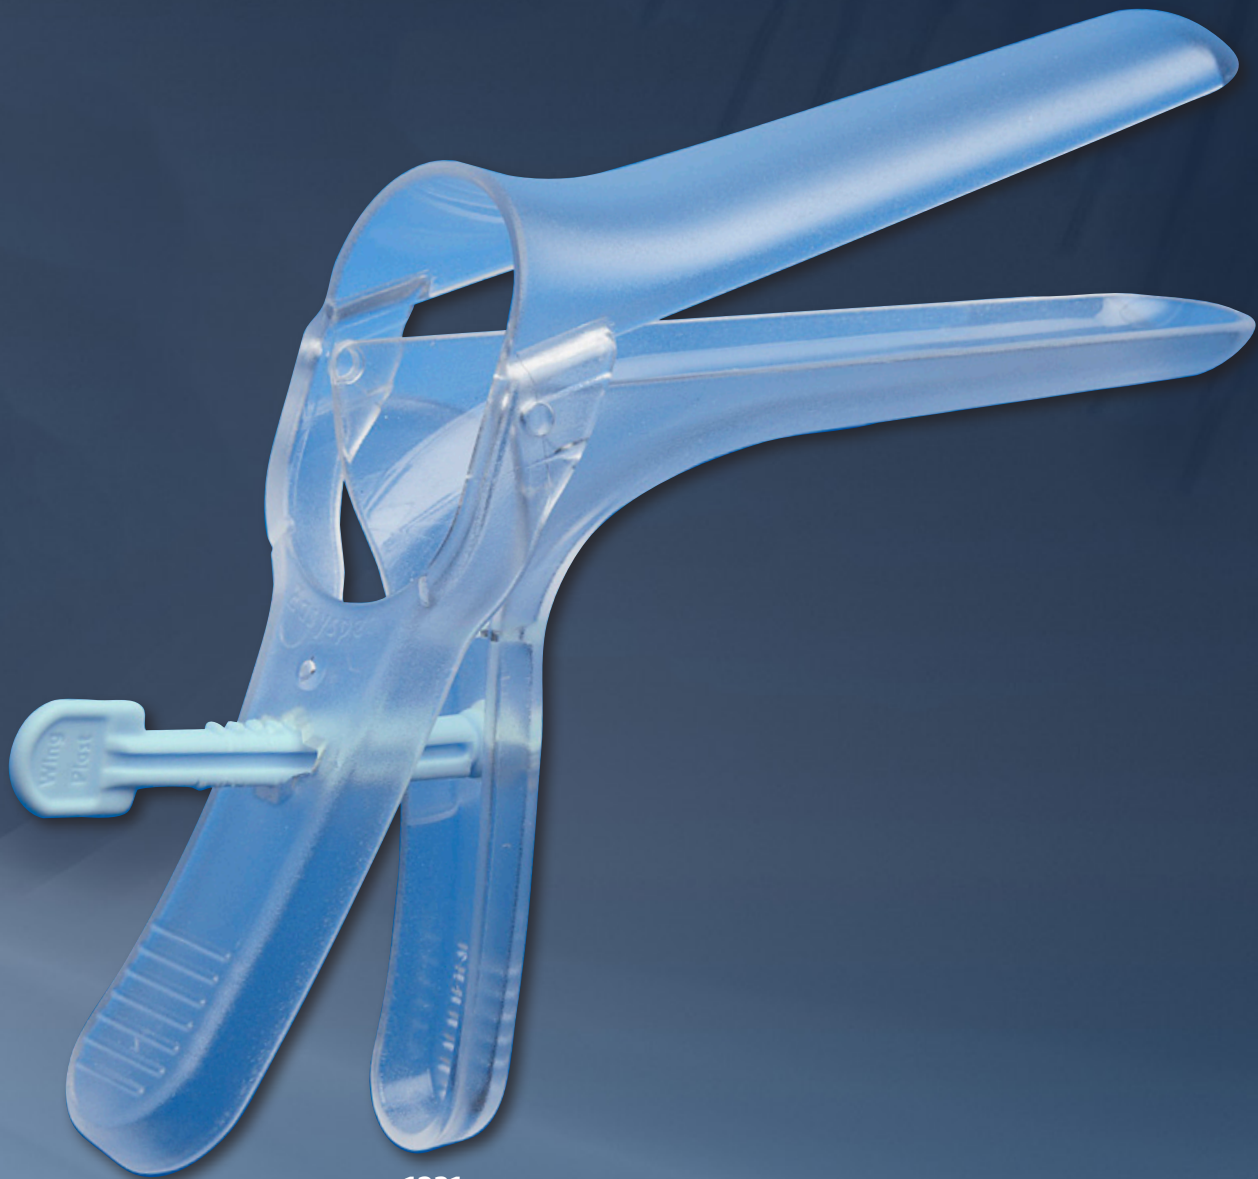

Gynecological Spatula I

1375/1377

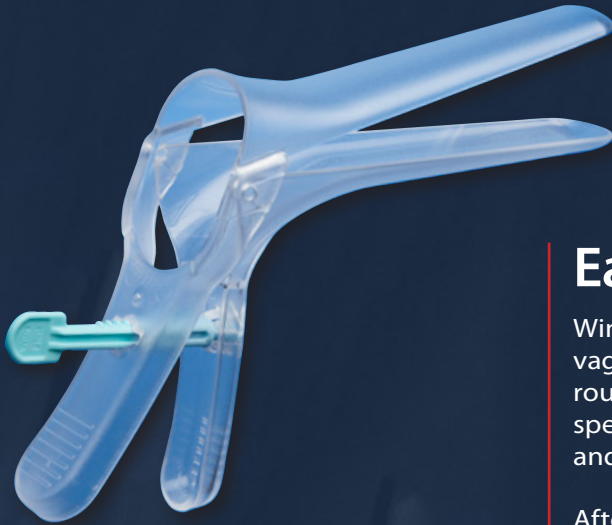

Wing Plast's Gynecological Spatula for cellsampling.

The plastic spatula has an ideal length of 20 cm. It is stable and comfortable to handle.

- Environmentally friendly plastic
- Ideal length

1221

EasySpec | 1221/1231/1241

Wing Plast's EasySpec is a non-sterile disposable vaginal speculum. The EasySpec range has smooth, rounded edges with high proven quality. The special low friction surface makes insertion easy and more comfortable for the patient.

After insertion the EasySpec can be locked at the correct angle by adjusting the silent locking device. The EasySpec range includes small, medium and large.

- Easy and safe to use
- Low friction surface for easy insertion
- Smooth, rounded edges for the patients comfort
- Proven high quality and strength
- Ridged handle for a good grip
- Design prevents "pinching"
- A silent and safe lock
- Optimal opening width

1351

HandiSpec | 1351

Wing Plast's HandiSpec consists of two separate beaks. The instrument is manufactured in a clear environmentally friendly plastic for better visibility and has 3 different locking positions.

- Lower and upper beaks can be inserted separately, or together as preferred
- Simple and safe locking in three steps
- Ergonomic design
- Smooth with rounded edges

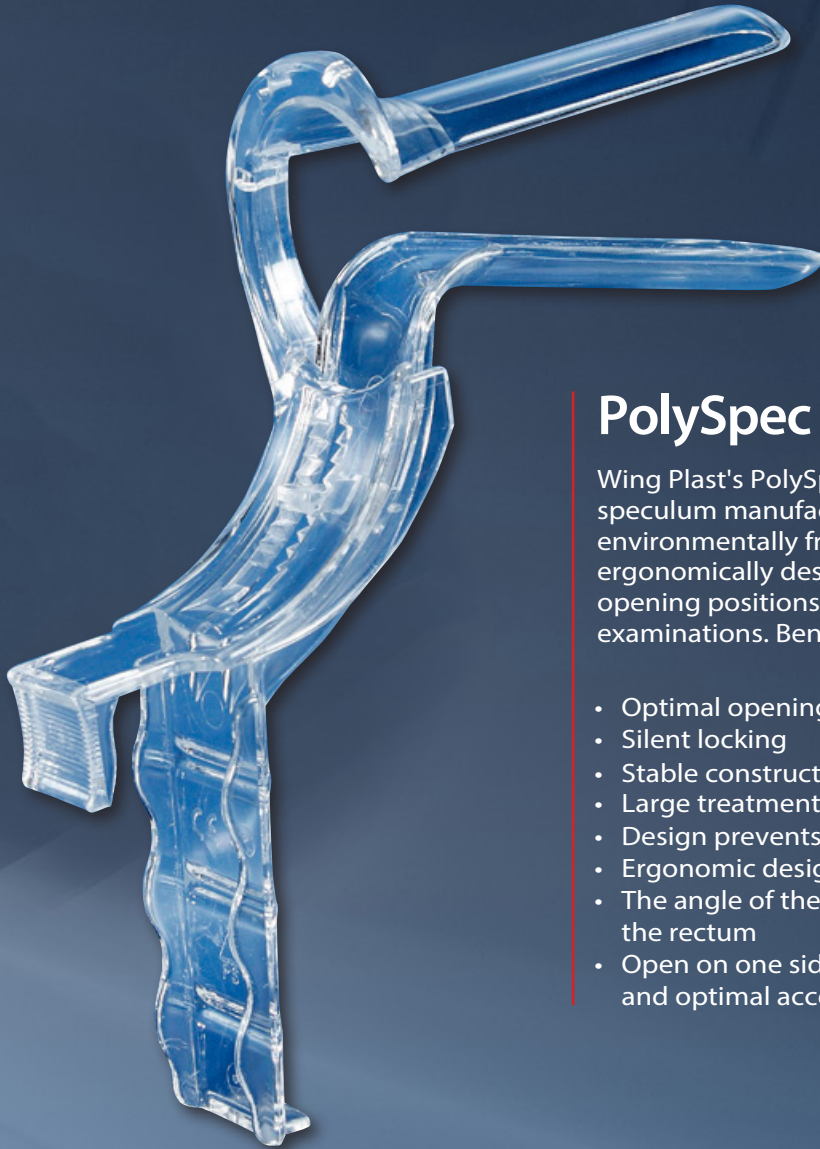

1361

PeriSpec I 1361

Wing Plast's PeriSpec 1361 consists of two parts, and has anatomically designed beaks which gives the following benefits:

- Lower and upper beaks can be inserted separately, or together as preferred
- Wider inspection field
- Larger treatment and examination area
- Better diagnostic possibilities
- Prevents labia and vaginal walls from falling in and blocking the vision
- The design of the PeriSpec makes it easy to rotate a quarter of a turn
- Simple and safe locking in multiple steps
- Ergonomic design
- A gentle insertion for the patient

1371

PolySpec I 1371

Wing Plast's PolySpec is a disposable vaginal speculum manufactured in a clear environmentally friendly plastic. It is ergonomically designed with 8 different opening positions and is often used for larger examinations. Benefits include:

- Optimal opening width
- Silent locking
- Stable construction
- Large treatment and sampling area
- Design prevents "Pinching"
- Ergonomic design
- The angle of the handle prevents contact with the rectum
- Open on one side, for an unobstructed view and optimal access

D52201

ComfiSpec I D52200 / D52201 / D52202 / D52210 / D52212

The ComfiSpec range contains sterile, disposable vaginal speculums. ComfiSpec is designed for the gynecologist with high expectations of quality and safe construction. It has very smooth, rounded edges that contributes to a gentle insertion.

After insertion, the ComfiSpec can be fixed to the desired angle by tightening or unscrewing the nut. The ComfiSpec range includes sizes: Virgin, Small, Medium, Medium-Long and Broad in sterile packaging.

- Optimum 38 ° opening angle provides best access
- Textured and Frosted handle provides superior grip and control
- Predictable fail safe feature is outside the patient
- Design prevents "pinching"
- Silent operation
- Proven quality and strength

D52208

ComfiSound I D52208

Our ComfiSound is a sterile, disposable and bendable uterus probe with a centimeter scale, which allows the clinician to accurately measure the length of the uterus. The probe has a movable cursor for easier measurement.

- Flexible
- Latex free
- Easy to handle
- Sterile

D524

Comfi Thread Retriever D524

Comfi Thread Retriever is designed to simplify the process of retrieving IUCD threads, and to make the process more comfortable for both patient and practitioner.

- Large "teeth" for easier access to the threads
- Easy to handle
- Sterile

D52231

Comfi Dilator | D52231

Comfi Dilator is designed to allow gentle opening of the cervix. The dilator is available in 2 sizes: 3-4 mm and 5-6 mm.

- Smooth tapered ends
- Available in 2 sizes
