

Magma

Hygiene Mattress

With  **Lentex**[®]

Developed for use in environments with stringent fire safety requirements, such as psychiatric hospitals, detention centres, jails, etc.

Magma

Magma has a volumetric weight of 37 kilograms/m³. The surface layer Lentex® surrounds the core of the mattress. The Magma Hygiene Mattress meets the BS 7177:2008 Medium Hazard and SS 876 00 10 standards, which is the equivalent of NT-Fire 055, one of the highest fire safety standards for mattresses in the world.

OUR UNIQUE SURFACE LAYER LENTEX®

This mattress is equipped with Järven's unique surface layer Lentex® which is laminated directly onto the foam core. This means that it has no seams or zippers.

The surface layer comes only in a fresh white colour which facilitates contamination detection on the surface of the mattress.

Cleaning of the mattress is done by wiping and disinfecting the mattress surface directly.

Active Membrane technology allows the mattress to breathe and reduces the risk of fluid penetration.

Our unique surface layer Lentex® has been developed, alongside the foam core, to reduce the pressure against the patient and provide excellent comfort.

FACTS

Art. No.	Sizes
5900	195-205 x 80 x 12 centimeters
5901	195-205 x 85 x 12 centimeters
5902	195-205 x 90 x 12 centimeters

Mattress weight

Approx. 7-9 kilograms depending on length and width (standard sizes).

Warranty – Mattress core

2 years for structural fatigue of the mattress core's B value in accordance with SS 876 00 11.
